

INDUSTRIES SERVED

PETROCHEMICAL

PROCESS UNITS

- ▲ Import/Export Terminals
- ▲ Process Plant Modularisation
- ▲ Pumping Stations
- ▲ Hydrogen Plants

OIL and GAS

- ▲ Refining
- ▲ Off Shore Platforms
- ▲ Storage (inc. Cryogenic)

WATER and WASTEWATER

- ▲ Reservoirs and Standpipes
- ▲ Elevated Tanks

MINING

- ▲ Blast Furnaces
- ▲ Basic Oxygen Vessels
- ▲ Precipitators

POWER STATIONS

- ▲ Wind Farms
- ▲ Waste to Energy
- ▲ Combined Heat and Power
- ▲ Combined Cycle Gas Turbine
- ▲ Coal
- ▲ Nuclear
- ▲ Decommissioning

PORT AUTHORITIES

- ▲ Ports and Logistics
- ▲ Containers
- ▲ Specialist Shipping

SERVICES PROVIDED

TEMPORARY UTILITIES

Design, supply, installation, testing, maintenance and final removal of:

▲ ELECTRICAL

Temporary power and lighting distribution systems operating at 11,000 or 415 volts via generated or temporary mains supplies. Earthing, bonding and electrical testing.

▲ MECHANICAL

Temporary mechanical services including potable and non-potable water, foul/dewatering, rainwater harvesting and pumped systems.

▲ SECURITY

Temporary security systems, evacuation alarms and CCTV systems.

▲ COMMUNICATIONS

Provision of all voice and data network services including structured cabling and wireless systems tailored to suit individual needs.

▲ CIVIL WORKS

Design and installation of all builders' works associated with utility services, including trenching, ducts, foundations, bases and foul drainage systems.

PROJECT SAFETY

There is **NO COMPROMISE** on safety.

Throughout the company structure we have a commitment to health and safety that influences our values, completes our decision-making and is at the heart of all our business planning.

Our objective is to manage our health and safety programme over and above compliance with local legislation, safety standards and other industry requirements. To achieve this we have contract managers who are supported by our health and safety management to enact our 'no compromise' vision on sites and in offices around the UK.

Our vision is simple - a corporate culture where any incident or injury is not acceptable.

We understand the industry we operate in and there are many potential hazards associated with the services we provide and the areas in which we work, but safety will always come first.

We work hard to continuously improve our health and safety performance by ensuring the principle of safety leadership is firmly embedded in our business through ongoing instruction, information, on-site training and supervision.
