PROJECT SOLUTIONS

We begin by **Listening**, we assist through **Experience** and we resolve with **Expertise**.

We understand the need to work **Safely**, control costs and comply with programme constraints in a demanding Airport environment.

Our activities include:-

- ▲ Temporary Electrical Site Services
- ▲ Short and Long Term Generator Solutions
- ▲ Plumbing
- ▲ Electrical Installations
- ▲ IT Infrastructure
- ▲ Air Conditioning
- ▲ 16th Edition BS 7671 Electrical Testing
- ▲ Heating & Cooling Systems
- ▲ Industrial & Commercial Fit-out Works
- ▲ Reactive & Planned Maintenance
- ▲ Portable Appliance Testing
- ▲ Internal & External Lighting
- ▲ Retail Fit-out Works
- ▲ Evacuation & Fire Alarm Systems

CASE STUDY

Eurest Restaurants

- ▲ Planned maintenance of all electrical networks within the five staff restaurants at Heathrow
- ▲ Reactive maintenance
- ▲ New installations and upgrades to accommodate new requirements, layouts and equipment

PROJECT SAFETY

There is **No Compromise** on safety.

Health & Safety is an active Management Board objective and all employees are thoroughly briefed prior to each new work activity. In consultation with our operatives we actively review our Safe Systems of Works, Method Statements and Risk Assessments. These can be modified to suit an individual campaign such as the *BAA One in a Million*.

We are an active stakeholder in the Behavioural Safety Scheme (SUSA) and have **Two** SUSA approved trainers.

As part of our PPE issue it is now **Mandatory to Wear Gloves** on all Airport projects.

TWENTY Safety Awards on Airport projects to date.

20
AWARDS

CASE STUDY

Emirates VIP Lounges

- ▲ Complete permanent electrical installation to both lounges at Heathrow and Gatwick
- ▲ Responsible for co-ordination between mechanical and electrical packages
- ▲ Condensed programmes on both lounges achieved to meet client expectation and overall satisfaction

PROJECT SPECIFIC LOCATIONS

We operate in most **Airside & Landside** areas with a determination to deliver solutions on time and with minimum disruption.

Our team consists of skilled individuals who are long serving in the Airport Division and their experience within the difficult operational constraints of an Airport is invaluable.

The majority of our activities have been carried out in the following locations:-

- ▲ International Departure Lounges
- ▲ CIP Lounges
- ▲ Search Areas
- ▲ Terminal Roofs
- ▲ Baggage Docks, Mezzanines and Halls
- ▲ Plant Rooms
- ▲ Basements
- ▲ Piers
- ▲ Aprons
- ▲ Retail Outlets
- ▲ Restaurants
- ▲ Car Parks
- ▲ Hotels

CASE STUDY

T5, Heathrow

- ▲ Design, install and maintain the temporary Power and Lighting distribution supplies in the main T5 Terminal Building
- ▲ Design, install and maintain the temporary Power and Lighting distribution supplies for the T5 rail terminal
- ▲ Maintain the temporary electrical & mechanical infrastructure systems installed in the Piccadilly and Heathrow Express Tunnel extensions into the T5 rail terminal

CASE STUDY

T3 Futures, Heathrow

- ▲ We have extensive electrical knowledge of the Airport which allowed us to survey the existing infrastructure in support of the Main Contractors own tender submission
- ▲ Design and implementation of a challenging Temporary Power and Lighting scheme within a Public area
- ▲ Working closely with the appointed Main Contractor to deliver the installation that will satisfy all stakeholders

PROJECT FINANCE

We have highly experienced Airport Commercial Personnel who are well versed in many different Forms of Contract. These include but are not limited to Cost Reimbursable and Traditional Lump Sum.

We can, if requested, provide full **Cost Transparency** and regularly monitor prices to ensure competitiveness and value for money.

Our approach Commercially is both pro-active and non-confrontational as we fully understand the requirement to keep our Client continually informed of Financial issues that may effect account values.

This facilitates our aim to agree project values promptly after completion.

CASE STUDY

T4 Fire Alarm, Heathrow

- ▲ Providing labour and supervision to assist a new contractor to BAA in the familiarisation of workforce, infrastructure and process's
- ▲ Having the resource available to accelerate the main works programme

OPERATIONAL RESOURCE

Our staff, operatives and vehicles have airside clearance at BAA airports and the facility for night shift working is available if required. All operatives have ACTA passports and CSCS certification.

OPERATIVE TRAINING

Operative training requirements are continually monitored to ensure that optimum levels of flexibility are maintained i.e. BAA Electrical Safety Modules 1 & 2, PASMA, MEWP, First Aid etc.
